Welcome to the Annual General Meeting of Leclanché S.A. Shareholders

26th June 2023

The meeting will start at 10:30 AM (CET).

2022 Financial Summary

Business Operations Update

Going Forward: 2023 & Beyond

2022 Financial Summary

Increase in EBITDA loss reflects higher material costs, investment in organisational capability, and higher operating cost behind carve out of E-Mobility

Over-indebtedness situation has been cured with the support of the Company's largest shareholder SEF-LUX¹

For further details, please see the 2022 Annual Report and the 2022 Management Report on the company's website*.

¹ SEF-LUX refers to: Strategic Equity Fund SCA Sicav RAIF – Renewable Energy, Strategic Equity Fund SCA Sicav RAIF – E-Money, Strategic Equity Fund SCA Sicav RAIF – Multi Asset Strategy, Golden Partner Private Equity FOF, AM Investment S.C.A. SICAV - FIS - R&D Sub-Fund, AM Investment S.C.A. SICAV - FIS - Liquid Assets Sub-Fund, AM Investment S.C.A. SICAV - FIS – Illiquid Assets Sub-Fund collectively are in aggregate the main shareholder of Leclanché, hereunder referred to as "SEF-LUX". Pure Capital S.A. being the beneficial owner as per the reporting platform of SIX Exchange Regulation AG's Disclosure Office - Date of publication of the most recent notification: 10 January 2023.

2022 Financial Results Consolidated

Income down 9% from CHF 21.8 M in 2021. Revenue in second half of 2022 increased 44% compared to first of the year.

EBITDA Loss CHF (57.5) M compared to CHF (44.9) M in 2021

Net loss CHF (85.6) M compared to CHF (80) M in 2021

Energy Storage Solutions

2022 Financial Summary

Business Operations Update

Going Forward: 2023 & Beyond

Leclanché E-Mobility

Electrification of vehicles in the medium & heavy transport sectors

We develop & design our own cells, modules, integrated battery packs & racks for electric vehicles and vessels of all sizes, with intelligent interfaces to charging infrastructure.

Leclanché Stationary Storage Solutions Renewable energy integration & Microgrids

We deliver Energy Storage Systems that reliably add intermittent solar and wind energy in the electricity network as dispatchable power on an as needed basis.

Specialty Battery Systems (SBS) Electrification of niche applications

Low-voltage portable battery packs for defense, medical and other industrial machines.

State of the Business: key updates

Strong order book & pipeline enables future growth

(1)

Continuous technological innovation

Partnerships with industry leaders to expand our global presence

Trusted Customer Partnerships Based on Comprehensive Offers Through Core Product Lines

A mixture of new, existing & Long-term Strategic Partnerships with Leading OEM Customers

© Leclanché SA 2023 - Slide 10

* A number of customer logos are excluded for confidentiality reasons.

Robust Growth Founded on CHF 361 M of Contracted Revenue

The product pipeline is bolstered by established key customer relationships

E-Mobility Order Book

CHF 347 M contracted revenue with a strong increase in market share for fleet transport

- Leclanché e-Marine has completed 17 vessel projects to date and currently has 20 projects ongoing with total energy of 65 MWh.
- Leclanché e-Rail has repeat orders from major rolling stock OEMs and new orders from leading rail maintenance companies.
- These projects use a combination of customer specific and generic battery packs all with Leclanché's class leading cell, modules and pack designs.

VScandlines

Scandlines RoPax Ferry System energy: 10 MWh

SWELWEC

MERMEC S.p.A Measurement Train Project energy: up to 3 MWh

Urovesa Truck System energy: 156kWh

© Leclanché SA 2023 - Slide 12

Marine Projects

2022: Orders for 8 new projects with total energy of 39 MWh and a contracted revenue of CHF 27.7M with 11 additional projects year to date in 2023 underlying continuous growth.

Continuous series of rail sector projects won by Leclanché:

 2020: 10.6 MWh, 2021: 11.3 MWh, 2022: 9.6 MWh, 2023 (H1): 7.8 MWh

2022: Orders for 17 projects with total energy of 23 MWh and a contracted revenue of CHF 13.4M.

Stationary Order Book

CHF 7 M Order Book and CHF 80 M pipeline ensures long-term growth in a rapidly expanding global market

- Leclanché Stationary has completed 21 Energy Storage projects to date and currently has 5 projects in execution
- Strong team of storage industry experts with complete integration expertise across a broad-range of Stationary applications
- Leclanché has two proprietary technology solutions developed in-house that will be deployed worldwide (LeBlock & Leclanché EMS)
- Development of version 2.0 of LeBlock for improved safety and more suitable to specific high-growth applications such as the microgrid and genset hybridisation marketplaces

Damen Shipyards* Millhaven/Kingston, Canada Load displacement & vessel charging System energy: 6 + 10 MWh

Major TSO* Crete, Greece Solar + storage System energy: 2.6 MWh

Olmatic GmbH Sembach, Germany Frequency regulation System energy: 12 MWh (Pending building permit)

Started in 2022- finalised in 2023*

Specialty Order Book

CHF 7 M Order Book and CHF 41 M pipeline ensures long-term growth

- New European customer acquisition in Defence and Medical sectors
- Strong collaboration and repeat orders from existing customers such as Linde and Armasuisse
- Expansion of our market to other European countries
- Proven competitive cost base underpins profitability
- Positive gross margin further enhanced by higher value-added contracts in Defence and Medical sectors
- Transition year with several new batteries moving into serial production

Continuous Cell Innovation in E-Mobility

New "Flame Retardant" cells

Non-flammable electrolyte additive provides enhanced cell safety

- Close to 80% reduction of risk of fire with no impact on cell performance
- Independent nail penetration tests confirm significantly lowered risk of thermal events with fire
- Non-flammable electrolyte additive provides enhanced cell safety option for rail, truck and bus markets

Water-based production of the high-capacity NMCA cathodes

First manufacturer worldwide to process high nickel content materials in an aqueous process

- 20% more energy density with similar size, weight and performance level
- Reduction of cobalt content of electrodes from 20 to only 5 percent
- Cathode manufactured using an environmentally friendly water-based binder process instead of toxic solvents

New XNO cell chemistry

XNO has nearly 50% higher energy density than LTO while maintaining long life and rapid charging.

- Ideal for vehicles or vessels that need to be rapidly charged to minimise down-time.
- XNO offers the option of radically downsizing the battery size for charging purposes
- High-energy density, fast charging and superior intrinsic safety levels

On the 29th of March this year, Leclanché E-Mobility announced a Memorandum of Understanding (MOU) with global power and technology leader, Cummins Inc. It will enable both companies to offer customers a range of hybrid, battery-only and fuel cell hybrid packaged solutions in marine and rail applications.

This collaboration represents a significant step forward in providing customers with a broader portfolio of integrated power solutions and will enable Leclanché to strengthen its position in these markets.

- Network in 190 countries, 600 distributors and approx. 7,200 dealers
- Currently employs 70,000+ people globally with revenues of \$28bn
- Expanding Leclanché's reach across the globe and emerging in the North American market

The Board and Management of the company have taken measures to refocus activities and build on existing markets and technologies. Implementation of better control and reporting systems, higher digitalisation and a leaner structure all being put in place to improve the performance of the company.

Building on growth in e-mobility market

- Focusing on our core markets Railway and Marine, with some selective projects in road transport
- Partner with customers and suppliers to expand beyond our existing markets in a second phase

Refocusing of the Stationary Business

- Putting the emphasis on product delivery, such as LeBlock and lower-level EMS
- Moving away from the EPC (Engineering Procurement Construction) and BOO (Build Own Operate) Models.
- Renegotiating and re-positioning legacy projects

Future of the Specialty Business

- Looking for the best structure to enable a solid growth of the unit in its niche markets
- Investigating close alignment with partners to create synergies

Sustainability and Environmental Impact

Leclanché is ready for the implementation of the new EU battery regulation focusing on creating a circular economy for batteries

- Participation in development of the new European Battery Directive regarding circular economy
- Environmental impact analysis as requested by the new EU battery directive nearing completion
- Strategic partnership with recyclers to recycle production scrap and batteries at end of life
- Circular economy concept '6R' created for compliance with the new battery directive

90% of the cell content in our batteries are recyclable and recoverable

100% renewable electricity used in cell, module and pack production processes

New EU Battery directive

- New EU battery regulation voted in June 2023
- Carbon footprint declaration will be mandatory from 2024 for EV and 2025 for heavy mobility
- Carbon footprint will become a key criteria of selection for our customers
- To proactively address this requirement, Leclanché participates at the EU level in defining the calculation method.

Committed to Low Environmental Battery Footprint

Preliminary carbon footprint benchmark based on first draft of the Product Environmental Footprint rules Potential of reduction identified

Preliminary calculation based on first data available in June 2023. Tendency based on an average product as defined in the PEFCR draft to be validated when final methodology and dataset will be available

Enhancing Leclanché's Global Visibility

Trade Shows (2022-23)

- Trade shows specific to each industry sector
- Increasing the brand awareness of Leclanché
- Used for launching of new products
- Effective way of attracting new customers
- Electric & Hybrid Marine Supplier of the year 2023

20 trade shows

Across 9 countries

EES, Munich

ESNA, Long Beach

InnoTrans, Berlin

EHMX, Amsterdam

SMM, Hamburg

Tag Der Scheine, Saarbrücken © Leclanché SA 2023 - Slide 23

2022 Financial Summary

Business Operations Update

Going Forward: 2023 & Beyond

Looking to the Future

Key drivers for our business over the coming year

- Growing pipeline through strategic partnerships and strong customer growth
- Continue to invest in product development and create value for customers/shareholders
- Cost optimisation through lean initiatives
- Company core values and continue building Leclanché culture
- Employee engagement and communication
- Secure means to grow capacity to meet our future needs
- Continue to digitalise and automate our company at every level
- Drive the business with sustainability at the forefront

Thank you for your attention

Annual General Meeting of Leclanché S.A. Shareholders

The break will end in

Disclaimer

This presentation has been prepared by Leclanché S.A. (the "Company") solely for informational purposes.

None of the Company or any of its directors, officers, prtners, employees, agents, affiliates or advisers nor any other person makes any representation or warranty of any sort as to, and no reliance should be placed on, the accuracy, completeness, fairness or reasonableness of the information or the opinions contained in this presentation or in any other document or information made available in connection with this presentation. No person shall have any right of action against the Company or any of its directors, officers, partners, employees, agents, affiliates or advisers or any other person in relation to the accuracy or completeness of any such information or for any loss, however arising, from any use of this presentation or its contents or otherwise arising in connection with this presentation.

This presentation contains non-IFRS measures (including certain ratios and key performance indicators, such as MWh, or megawatt hour, which means a unit of energy equal to 1MW of power being applied continuously for one hour, which the Company uses to illustrate its overall production as demonstrated through the electrical energy storage capacity of its battery systems). These measures have limitations as analytical tools and should not be considered in isolation or as substitutes for analysis of the Company's results as reported under IFRS.

This presentation contains statements that constitute forward-looking statements relating to the business, financial performance and results of the Company and the industry in which the Company operates. Such forward looking statements in this presentation are for illustrative purposes only. These statements may be identified by words such as "expectation", "belief", "estimate", "plan", "target", "forecast", "pipeline", and similar expressions or the negative thereof; by the forward-looking nature of discussions of strategy, plans or intentions; or by their context. All statements regarding the future are subject to inherent risks and uncertainties, and various factors could cause actual future results, performance or events to differ materially from those described or implied in these statements. Such forward-looking statements are based on numerous assumptions regarding the Company's present and future business strategies and the environment in which the Company will operate in the future. Further, certain forward-looking statements are based upon assumptions of future events that may not prove to be accurate, and neither the Company nor any other person accepts any responsibility for the accuracy of the opinions expressed in this presentation or the underlying assumptions. Past performance is not an indication of future results and should not be taken as a representation that trends or activities underlying past performance will continue in the future. The forward-looking statements to reflect any change in the Company's expectations, and the Company expressly disclaims any obligation or undertaking to release any updates or revisions to these forward-looking statements to reflect any change in the Company's expectations with regard thereto or any change in events, conditions or circumstances on which any statement is based after the date of this presentation or to update or to keep current any other information contained in this presentation or to provide any additional information in relation to such forwa

This presentation does not constitute, and should not be construed as, an offer to sell or issue securities or otherwise constitute an invitation, inducement, solicitation or recommendation to any person to purchase, underwrite, subscribe for or otherwise acquire securities in the Company or any of its affiliates or constitute an inducement to enter into investment activity in any jurisdiction.
